USING THE SETUP SCREEN

Character Name & Level
Current Experience Points
Experience Points Required for Next Level
Ism Levels

Current/Required for Next Level

In World Tour mode, your character's Ism level increases as you gain experience points by defeating opponents. The higher the level, the more often you can perform Custom Combos and Super Combos. At set point increments, your character's level increases and you earn an Ism Plus (special ability). You can add up to three Ism Pluses to your character's base Ism.

To use the Status screen:

1. Select an Ism: X, A or V.
2. Select a game speed: Turbo 1 or Turbo 2.
3. Add any Ism Plus you have earned. You can acquire and add up to three, as shown by the blocks. Green Ism Plus requires one block and Red Ism Plus requires two blocks.
4. Adjust the balance of power (POW) and defense (DEF). Adding more to one side decreases the level of the other side. As your character's level increase, the range adjustment will widen.
5. Press the **Start** button to exit.

ENTRY MODE

Register your World Tour characters in order to use them in other game modes. Load the character data, previously saved onto a Memory Card, and choose ENTRY to register it. You can register up to six characters. Once registered, your characters will be displayed on the Character Select screen in Arcade, VS and Training Modes.

BASIC ATTACKS & COUNTERS

- Standing Block** Press → or ← away from opponent
Air Block Press → or ← away from opponent (A and V Isms only)
Crouching Block Press ↙ or ↘ away from opponent

Block an opponent's attack by pressing a **Directional button** away from it. Use a standing, air or crouching block according to the attack. (Air blocks are not available with X Ism).

- Defensive Fall** When knocked up in the air, press 2 Punch buttons simultaneously (not available with X Ism)
Use a defensive fall to avoid an opponent's additional attacks.

- Defensive Roll** When knocked up in the air, press 2 Kick buttons simultaneously (not available with X Ism)

- Throw, Escape** → or ← + 2 Punch or Kick buttons simultaneously
This move works as a throw when you are attacking, or as an escape when an opponent grabs your character.

- Alpha Counter** When blocking an attack, press → or ← (toward opponent) + Punch and Kick buttons of the same strength
This counterattack move uses 1 Super Combo level and shortens the Guard Power Gauge.

- Damage Reduction** Press the Directional buttons, Punch or Kick buttons rapidly.
This counter move reduces damage when you're under attack or blocking.

- Guard Crush** Your Guard Power Gauge shortens while you're blocking, or if you're hit with a Guard Crush. If you refrain from blocking, the gauge will gradually recover. If the gauge drains out, you won't be able to block until you recover power.

SUPER COMBO

The Super Combo Level Gauge builds up as you perform moves. When it reaches a certain length, its level increases, allowing you to perform Super Combos, Alpha Counters and Custom Combos.

- X-Ism:** You can perform a Super Combo only when the Super Combo Level Gauge is full. Super Combos use the entire gauge.
A-Ism: You have three levels of Super Combos, corresponding to the three levels of punches/kicks (light, medium and heavy). The Punch or Kick button you press determines the power of the Super Combo, and uses a similar amount of the gauge. The higher the gauge level is when you start, the more powerful your Super Combo will be.

CUSTOM COMBO

Custom Combos are available with V-Ism characters only.

When a V-Ism character's Super Combo Level Gauge builds up to 50% or more, you can perform a Custom Combo by pressing Punch and Kick buttons of the same strength simultaneously.

- During a Custom Combo, shadow images follow your character and attack in the same way.
- You can continue a Custom Combo until the Super Combo Level Gauge runs out.
- You cannot block during a Custom Combo.
- If you take damage, the Custom Combo ends.
